**Manufacturing Transformation**

Unprecedented Results in Meeting Milestones Through a Client-Focused Mindset

Patients Treated

7,500+

Clients Served

125+

Technology Transfers

50+

## Focused on Quality Manufacturing

Since 1999, we have been **trusted** to provide industry-leading development and manufacturing services to advance commercialization of cell therapies.

Whether you need to develop an efficient process for a promising cell-based therapy or need access to commercial quality manufacturing, you can trust and rely on us to deliver.

## Significant Industry Experience With:

- Autologous and Allogeneic Applications
- T Cells (CAR, TCR, Treg)
- Dendritic Cells
- Natural Killer Cells
- Hematopoietic Stem Cells
- Mesenchymal Stem Cells

## Why PCT Global Service Platform

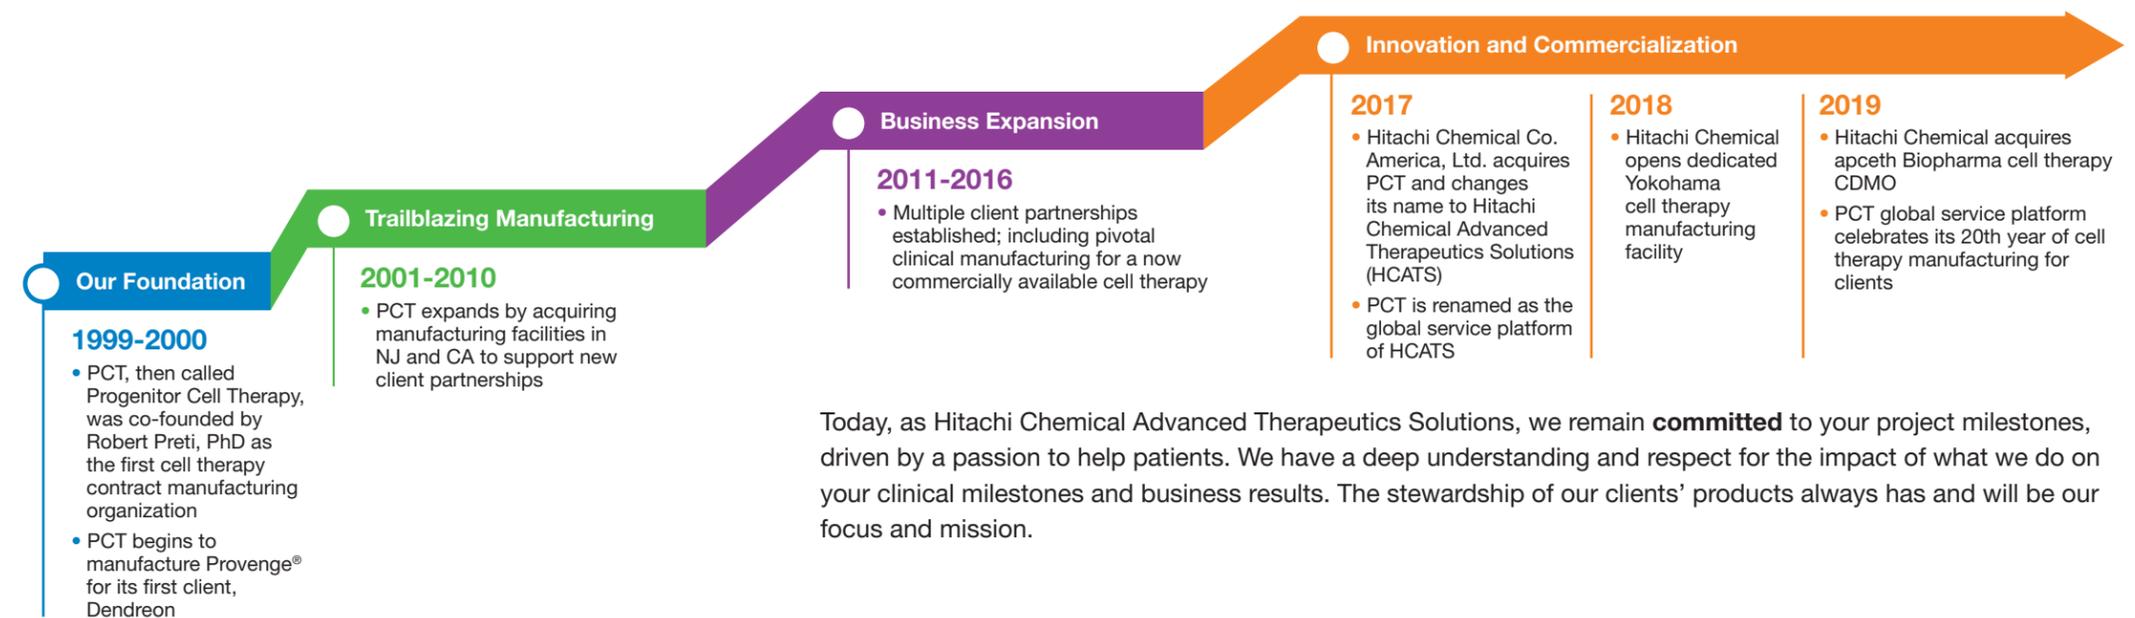

We have a **proven track record** of helping clients overcome the complex and unique challenges presented by cell-based therapy development and manufacturing. Our expertise and experience can serve as a catalyst to help you advance these therapies towards commercialization.

Here's why clients work with us:

- **100% patient safety** manufacturing record
- **Quality** – our strong quality commitment is at the heart of everything we do
- **Flexibility** – from infrastructure layout to equipment to process optimization
- **Passionate** – our strongly embedded core values drive our commitment to our clients and their patients' needs
- **Effective** – whether early or late stage, we can deliver timely and well-orchestrated technology transfers

# 20 years of pioneering manufacturing transformation

## We are Hitachi Chemical

Today, as Hitachi Chemical Advanced Therapeutics Solutions, we remain **committed** to your project milestones, driven by a passion to help patients. We have a deep understanding and respect for the impact of what we do on your clinical milestones and business results. The stewardship of our clients' products always has and will be our focus and mission.

# Global footprint to support the advancement of your future global commercial therapy

## About the Hitachi Chemical Regenerative Medicine Business Sector

The Hitachi Chemical's Regenerative Medicine Business Sector provides contract development and manufacturing organization (CDMO) services at current Good Manufacturing Practices (cGMP) standards, including clinical manufacturing, commercial manufacturing, and manufacturing development. The global footprint of the business is approximately 200,000 square feet and includes operations in North America (Allendale, New Jersey and Mountain View, California), Europe (Munich, Germany), and Japan (Yokohama). The business leverages two decades of experience exclusively focused on the cell therapy industry.
